

JOHN WRIGHT

Westfield Farm North Dalton, Drifffield, YO259EJ · 07493105010

john.wright105048@gmail.com

My career objective is to use my skills in technology to aid customers and companies in meeting their specification and objectives. I also aspire to help in the innovation of up and coming technologies.

EXPERIENCE

11/10/18 – 11/08/19

WORKEXPERIENCE, RED BONSAI

During my time at a local web designer company called Red Bonsai (<http://www.redbonsai.co.uk/>) it allowed me to gain an insight into how coding using HTML and Jscript combine with design to create dynamic websites.

25/08/20 – PRESENT

EMPLOYMENT, THE BEST CONNECTION

During my time at working with The Best Connection (TBC) I have worked at a couple of companies which are: Yorkshire Green and Westlands. At both of these companies I learnt to adapt to different working environments quickly as well as getting experience of being in a workplace

EDUCATION

MONTH YEAR

A-LEVELS, POCKLINGTON

Computer Science – C

BTEC ICT Level 3 International Extended Certificate – D* (Distinction Star)

Business Studies – B

MONTH YEAR

GCSSES, POCKLINGTON

Computer Science – 5

English Language – 5

English Literature – 4

Geography – 6

French – 5

Mathematics A Option H – 5

Design – C

Biology – B

Chemistry – B

Physics – C

SKILLS

- Leadership – during my first year in sixth form I took part in an extracurricular activity called Young Enterprise. In this competition I lead a team through a competition of making our own businesses. During this experience I learnt leadership, communication, and resilience
- Programming- I have taken it upon myself to learn a bit of C# and JavaScript. I have also coded in VB for school projects
- Presentation skills- During my experience of doing young enterprise I improved my ability to present as my team and I had to present our business to 4 judges who were businessmen and women.
- Teamwork – during my time at Pocklington school I was a part of the 1st team rugby team there I learnt working together as a team. Furthermore, I have also taken part in the young
- Practical- When I was 12 years old, I built a 60cc engine go-kart. This proved to be a challenging task. I also took on the challenge of building my own computer where I had to make sure that the parts were call compatible
- Adaptive – While working with TBC it allowed me to improve my ability to adapt to different workplaces quickly

ACTIVITIES

In my free time, I enjoy learning more about how code can be used to make new things particularly, interactive projects. I have been researching augmented reality with UNITY and products like Arduino, an open-source electronics platform that is able to read inputs and turn it into outputs. Currently, I'm working on how to store data in an SQL database and how to read it from that database, while proving to be challenging I am enjoying the procedure required to resolve the task. I also built my own computer this proved to be a little challenging as the parts had to be compatible with each other.

At the time of writing this application, I am in my last year at Pocklington School. For my final year, I have received the position of School Prefect. This role was only awarded to 20 students. This position came with a lot of responsibility as it means that I help the staff with the day to day running of Pocklington School. This had allowed me to develop my organisation time management qualities. Also, within this role I tour parents of potential students, so they have a better understanding of the school, this gave me the chance to improve on my confidence and presentation skills.

I have also played rugby from the age of 7 and within my time playing rugby my finest moment of this experience was when I represented my school on a NatWest final in 2016/17 at the Six-Ways Stadium at Worcester.
